A STATEMENT

OF

ADVERTISING PRINCIPLES

1. **GOOD ADVERTISING—aims to inform the consumer and help him to buy more intelligently.**

2. **GOOD ADVERTISING—tells the truth, avoiding misstatement of facts as well as possible deception through implication or omission. It makes no claims which cannot be met in full and without further qualification. It uses only testimonials of competent witnesses.**

3. **GOOD ADVERTISING — conforms to the generally accepted standards of good taste. It seeks public acceptance on the basis of the merits of the product or service advertised rather than by the disparagement of competing goods. It tries to avoid practices that are offensive or annoying.**

4. **GOOD ADVERTISING—recognizes both its economic responsibility to help reduce distribution costs and its social responsibility in serving the public interest.**

U. S. POSTAL UNIT GUIDE OF CHARLOTTE, N. C.

Reproduced from Post Office Copy

1957

To speed up the distribution and delivery of the mails, Charlotte has adopted the NUMERICAL ZONING SYSTEM. The streets listed alphabetically with the unit number for each street (or portion of it) are shown on the following pages. Unit numbers for box service are listed separately. Unit numbers should be included as a part of the complete address of all mail and the number should appear after the name of the city and before the name of the state.

All users of the mails are urged by the Post Office Department to cooperate in this effort by including the unit number in all local addresses as well as inform correspondents of this addition to their own official address, and to have their postal unit number on their letterheads, envelopes, statements, and all advertising matter. The Post Office on request, will be glad to cooperate with you in assigning proper unit numbers to your mailing lists.

You are requested to notify all your correspondents of the correct Zone Number to be used in addressing your mail and to include this number in your return address. Your strict observance of this practice will be mutually beneficial in that it will facilitate the handling of your mail by this Post Office and result in speedier delivery for you.

HILL'S CHARLOTTE

Directory of Householders, Occupants of Office Buildings and Other Business Places, INCLUDING A Complete Street and Avenue Guide

1957

Including Hoskins and Thomasboro

Copyright, 1957, by Hill Directory Co., Inc.

In the following list the numbered streets are arranged in numerical order followed by the named streets in alphabetical order, the intersecting streets being shown. The number of each building on the street is given in numerical order, and opposite the number is placed the name of the occupants or houseowner or tenant. In the business blocks containing offices the occupants are shown by room numbers where practicable, in apartment homes the number denotes the number of the apartment. In all streets both sides of the street are included in one list. The profession or business of individuals or firms is given only at their respective place of business; to find occupation of others refer to Alphabetical List of Names.

The symbol ◎ following a householder's name indicates that we have received information during the canvass that the house is owned by some member of the family, but as the publisher cannot and does not guarantee the correctness of the information furnished, nor the complete absence of mistakes no responsibility for errors can be or is assumed, nor can the publisher furnish further information than that shown.

Telephone numbers, as supplied to us on our canvass are shown opposite names.

Figures in parenthesis denote old numbers.

(The numerals that appear at right edge of columns, ahead of street descriptions and some street intersections, are merely for the guidance of the publishers, and have no other significance.)

(This section includes some listings reading "No Return." In each case the Publishers tried diligently, by various means, to obtain the information for the occupants but were unsuccessful. First, two personal calls were made by an enumerator; next, a double postal card was mailed and the telephone used when possible.)
